SUMMARY

Full-Stack Developer with experience building production web applications, internal systems, campaign platforms, dashboards, booking tools, reward workflows, and reusable UI components using Next.js, React, TypeScript, Node.js, PostgreSQL, Prisma, REST APIs, and n8n. Experienced in working across frontend, backend, database-driven features, API integrations, automation workflows, testing, and production support.

EXPERIENCE

Software Developer

The D Group / TDG Holdings Sdn Bhd

May 2025 - Present, Kuala Lumpur, Wilayah Persekutuan Kuala Lumpur

- Developed and supported production CRM, loyalty, campaign, booking, reward, and field-force web applications for clients including Chanel, Alcon, Abbott, Jasmine, Drypers, GoodMorning, Haleon, MJN, BlueScope, ADC, and others.
- Built and maintained web applications using Next.js, React, TypeScript, Vite, Node.js, Express, Prisma, PostgreSQL, Tailwind CSS, REST APIs, Redux, n8n, and external webhook integrations.
- Developed client-facing campaign platforms, admin portals, appointment booking tools, dashboards, receipt workflows, reward redemption flows, scheduling tools, reporting features, and bulk client upload flows.
- Built automation workflows using n8n, custom APIs, scheduled webhooks, CSV exports, SFTP exports, and external integrations to support marketing, campaign, booking, and support operations.
- Supported production systems by debugging issues, fixing bugs, improving existing features, testing user flows, and coordinating with project managers, operators, and senior developers.
- Used Git, GitHub, Postman, Jest, Playwright, and structured development workflows to test changes, reduce regressions, and support smoother production updates.

Full-Stack Developer Intern / Part-Time Developer

Port of Tanjung Pelepas (PTP)

September 2023 - February 2024, Gelang Patah, Johor

- Built internal business system modules using Next.js, tRPC, Mantine UI, SQL, and backend logic to support operational workflows for port personnel.
- Developed PTP iConnect modules including internal incentive tracking, PPE item request forms, newsfeed features, reusable UI components, and table-based management screens.
- Created a fire extinguisher inspection system using Joget DX, a low-code platform, helping digitize manual inspection workflows and reduce inspection time by 40%.
- Collaborated with internal teams to implement usability enhancements, increasing clarity of user interfaces and streamlining access with Mantine UI components.
- Contributed to SQL database handling, frontend component development, backend integration, and reusable UI design for internal applications.

Freelance Full-Stack / Frontend Developer

Talaqqi, AJXB, PTP iConnect Remote

November 2022 - January 2025

- Delivered frontend and full-stack features across education, event-management, and internal portal projects using Next.js, TypeScript, tRPC, Prisma, SWR, Mantine UI, and Laravel APIs.
- Implemented authentication, onboarding flows, API integrations, reusable UI components, responsive layouts, and client-side data rendering for user-facing pages.
- Refined UI/UX with clients and teams, resolved frontend bugs, refactored components, and improved cross-device usability for web applications.

SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, Vite, React Router, Tailwind CSS, Mantine UI, CSS, Figma, Responsive Design, Reusable UI Components

Backend & APIs: Node.js, Express, REST APIs, tRPC, Prisma, Drizzle, JWT, API Integration, Custom API Logic

Database: PostgreSQL, Supabase, NeonDB, SQL, Database Design, Campaign Configuration, Data Management

Automation & Integration: n8n, Webhook Automation, External Webhooks, Scheduled Alerts, CSV Export, SFTP Export, Core API Integration, Marketing Workflow Automation

Testing & Tools: Git, GitHub, Postman, Jest, Playwright, VS Code, Windows WSL2, AWS S3, Debugging, Production Support

Software Practices: Agile Methodology, Software Development Lifecycle, UI/UX Optimization, System Modernization, Stakeholder Collaboration, Product Development, Quality Engineering

PROJECTS

MY Birthday Freebies

Malaysia Reward Discovery App | Next.js App Router, TypeScript, React, Tailwind CSS, Zod, Vitest, Node/TypeScript Scheduler • [freebies-trip.vercel.app/](#) • May 2026

- Built a Malaysia-focused birthday reward discovery app using Next.js App Router, TypeScript, React, Tailwind CSS, Zod, Vitest, static freebies.json data, and local birthday storage.
- Implemented reward filtering, saved brands, preparation steps, calendar reminder export, brand detail pages, eligibility rules, source links, evidence notes, and confidence status.
- Developed a Gemini-powered Node/TypeScript scheduler with tsx to search and revalidate official Malaysia sources, update reward data, and maintain last-checked dates.

Gemini Video Understanding Dashboard

AI Video Analysis Dashboard | TypeScript, Node.js, Express, Vite • [ai-video-understanding.vercel.app/](#) • April 2026 – May 2026

- Built a Gemini video understanding dashboard using Express, TypeScript, Vite, and @google/genai to analyze YouTube URLs, uploads, recordings, and live camera streams.
- Implemented secure server-side Gemini API handling, upload validation, multer, @vercel/blob, Vercel serverless endpoints, Gemini error handling, and temporary file cleanup.
- Rendered structured JSON reports with summaries, timelines, objects, actions, screen text, speech, quality issues, tokens, latency, file size, and USD/MYR cost estimates.

Interactive IQRA

Final Year Project | Next.js, tRPC, Mantine UI, Liveblocks, PostgreSQL/NeonDB, Stripe, UploadThing • July 2023 – July 2024

- Built a real-time IQRA learning platform using Next.js, tRPC, Mantine UI, Liveblocks, and PostgreSQL/NeonDB for interactive Arabic letter learning and tutor/student flows.
- Implemented live cursor collaboration, audio pronunciation support, room-based learning, responsive UI components, and reusable interface patterns for web-based education.
- Integrated typed API logic, database-backed learning content, media handling, payment-ready flows, and maintainable component-driven architecture.

Intellibraille

AI Accessibility Web App | Next.js, AI Features, Braille Translation, Responsive UI • [intelli-braille-i645.vercel.app/](#) • July 2023

- Built an AI-assisted Braille translation web application using Next.js to convert text and characters into Braille format through a clean accessibility-focused interface.
- Delivered the project from concept to deployment within 24 hours, focusing on AI integration, rapid prototyping, responsive design, and accessibility.
- Implemented user input handling, generated Braille output, accessible UI structure, and clear presentation of AI-driven translation results.

EDUCATION

Software Engineering

Minor in Bachelor of Computer Science (Software Engineering) • Universiti Teknologi Malaysia (UTM) • Johor, MY • October 2020 – February 2025 • CGPA: 3.65

- JPA Scholarship Recipient

INVOLVEMENT

AI & Content Creation Seminar 2024 – Organising Team / Co-author

Universiti Teknologi Malaysia (UTM), Kejora Hall • June 2024 – May 2026

- Supported seminar planning, social media promotion, event coordination, technical readiness, and post-event write-up for an AI and content creation event with academic and industry speakers.

RoboKar Workshop Participant

School of Computing, UTM | Robotics and Arduino Programming Workshop • May 2024

- Practised Arduino/C++ robotic programming, line-sensor logic, debugging, team problem-solving, and RoboCar track testing during a hands-on robotics workshop.

PTP 100 Million Trees Campaign Volunteer

Port of Tanjung Pelepas (PTP) | Tanjung Piai National Park, Pontian, Johor • October 2023

- Volunteered with PTP, Southern Volunteers, and Tanjung Piai National Park staff to plant mangrove saplings, supporting sustainability, teamwork, and community engagement.
